

AIR SCENTING DIFFUSER MAS701

Air Scenting Diffuser MAS701 harnesses the advanced nebulizing technology using filtered air to turn fragrance oil into an ultra-dry micro mist. Unlike other diffusion systems that use heat, fan or evaporation, nebulizing technology allows the diffusion of a consistent scent throughout while keeping the originality and therapeutic values of the fragrance unaltered.

Compact, easy to use and elegantly designed, the MAS701 makes an ideal scenting solution that covers up to 300m³.

Long lasting scent

Micro-fragrance particles stay in the air longer creating a longer lasting and consistent fragrance delivery

Fully customizable settings

Operating time, Duration and Intensity of sprays can be adjusted based on your requirements.

Self diffusing System

Can be connected to the Air Conditioning System or used as a Standalone with the natural air flow of the space.

Sleek and refined design

The unit will easily blend in any environments. Its compact size makes it easy to install.

Refillable cartridge 200ml

Easy refill of cartridge bottle for quick and easy service. Fragrance can last up to 60 days *

Select from our range of specially developed fragrances to suit any ambience
